# Successful product stewardship schemes

MUST

**Support multiple product life cycles**

- > RE-USE
- > RECYCLE

MUST

**Support high quality end-of-life or residue management**

MUST

**Educate communities and drive behaviour change**

MUST

**Embrace technology and innovation**

MUST

**Change the game, inspiring and informing design for recyclability**

1

You need a market for  
your outputs

2

Your end game may not be achievable at the start  
The waste hierarchy is a journey

3

Infrastructure takes time and investment  
Have a back-up plan

4

Everything takes longer than you hope  
(not everyone shares your enthusiasm)

5

Consider initially enabling 'free loaders' to reduce barriers

6

If you expect your commodity revenue stream to support the scheme in its entirety, you will be disappointed

Recycle  
Together we are making  
a positive difference.  
officeworks.com/au/recycle

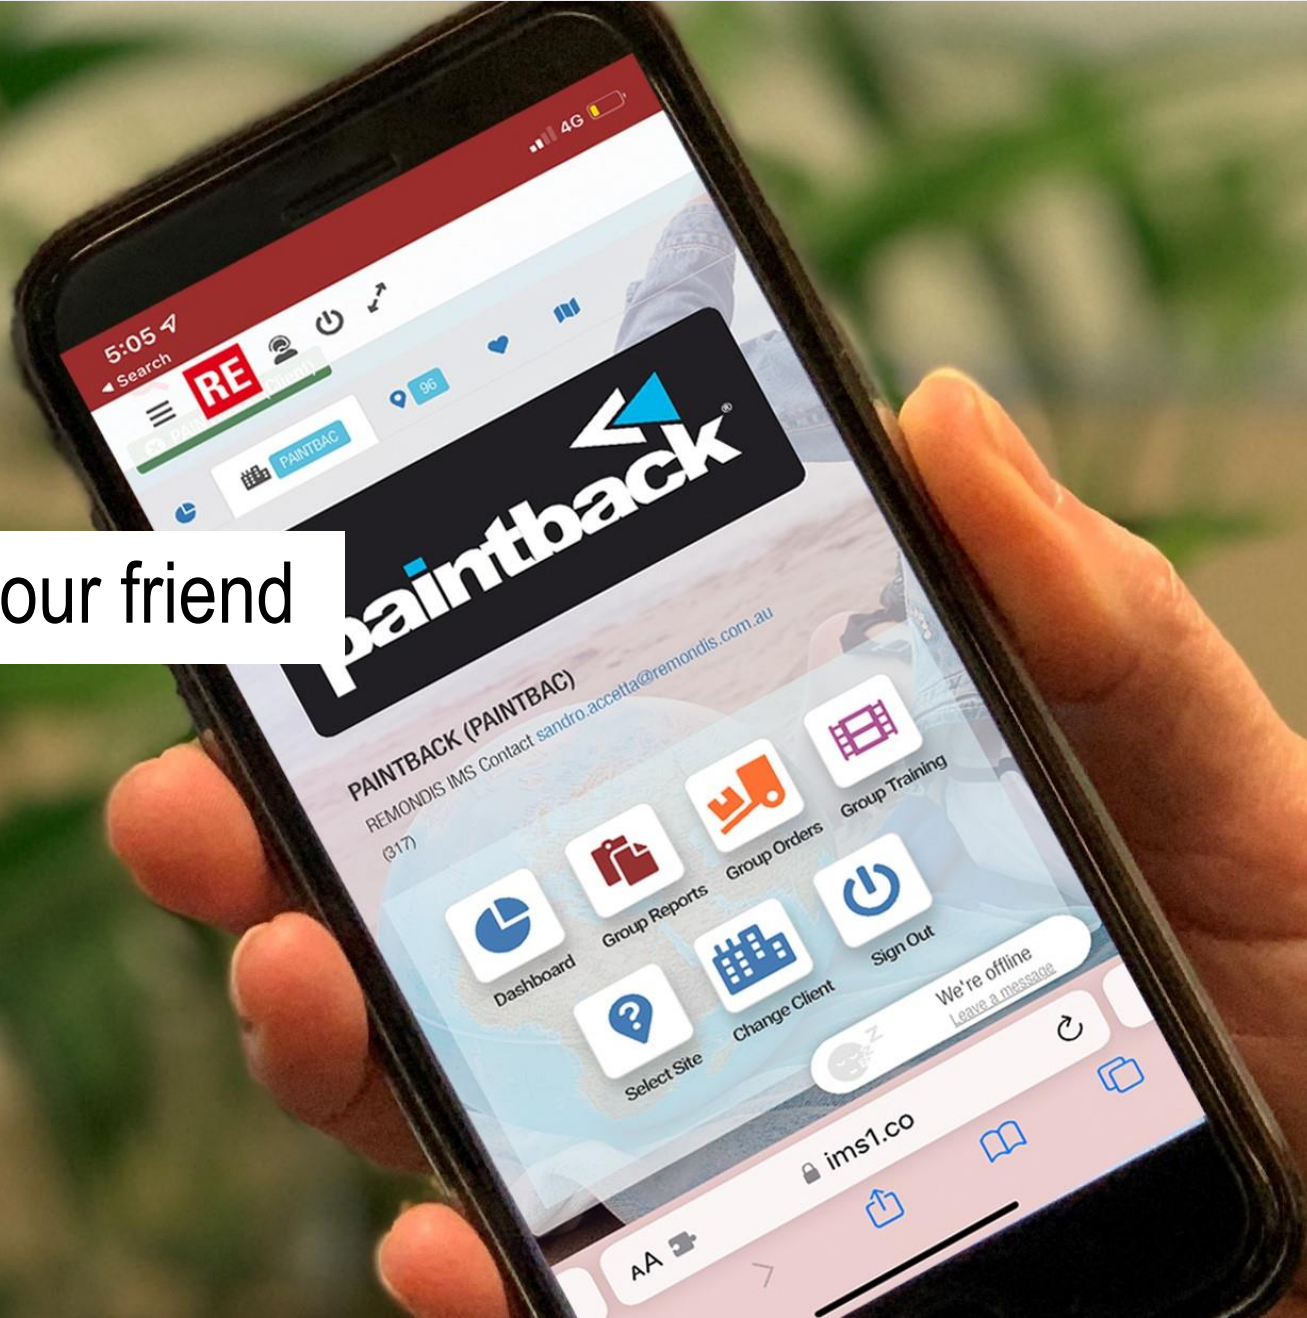

7

Collaboration between schemes  
reduces collection point logistics pain

8

Technology is your friend

9  
9

You can't stop a moving train

## To wrap up

REMEMBER

**Horses for courses**

REMEMBER

**Never walk alone**

REMEMBER

**Be aware of your  
weak spots**

REMEMBER

**Never lose sight of  
the scheme's  
objectives**

REMEMBER

**Government policy  
is your friend**

**REMONDIS®**

WORKING FOR THE FUTURE
